

Dongguan Poweramp Technology Limited

广东省东莞市松山湖园区兴惠路 1 号

No.1 Xinghui Road, Songshan Lake Park, Dongguan City, Guangdong Province

Issue: 2021-A Doc No.: 2021-A-063 Issue Date:9/16/2021

SAFETY DATA SHEET

1 Product & Company Identification

Product Identification

Chinese Name	二次锂离子电池组
English Name	Lithium Ion Polymer Rechargeable Battery
Proper Shipping Name	Lithium Ion Battery
Product Description	Rechargeable lithium ion battery(4 Cells)
Poweramp Model Name	BWX260-5000-15.4 15.4V 5000mAh 77Wh
Poweramp PN	519110001269
UN No.	UN3480/UN3481
UN38.3 Report No.	/
Capacity	5000 mAh
Nominal voltage	15.4 V
Watt-hour	77 Wh
Equivalent lithium content	6 g
Approximate Weight	340 g

Safety Data Sheet Provider Information

Manufacturer	Dongguan Poweramp Technology Limited
Address	No.1 Xinghui Road, Songshan Lake Park, Dongguan City, Guangdong Province
Postcodes	523808
Telephone	0769-38868888
E-mail Address	EHS-Safety01@Poweramptech.com

| Emergency call

Emergency call	0769-38868888
----------------	---------------

2 Hazardous Identification

As a whole, the battery is not dangerous in the correct use.	
Explosive risk	This article does not belong to the explosion dangerous goods
Flammable risk	This article does not belong to the flammable material
Oxidation risk	This article does not belong to the oxidation of dangerous goods

Dongguan Poweramp Technology Limited

广东省东莞市松山湖园区兴惠路1号

No.1 Xinghui Road, Songshan Lake Park, Dongguan City, Guangdong Province

Issue: 2021-A Doc No.: 2021-A-063 Issue Date: 9/16/2021

Toxic risk	This article does not belong to the toxic dangerous goods
Radioactive risk	This article does not belong to the radiation of dangerous goods
Mordant risk	This article does not belong to the corrosion of dangerous goods
other risk	This article is Lithium-polymer battery, Watt hour rate 77 Wh, which belong to the
	miscellaneous dangerous goods, as is described in IMDG CODE and IATA DGR.

3 Composition /Information on Ingredients

Important note: The battery should not be opened or burned. Exposure to the ingredients contained within or their combustion products could be harmful.

Component	CAS No.	EC No.	%/wt.
Cobalt lithium manganese nickel oxide	182442-95-1	695-690-9	5-40
Ethyl propionate	105-37-3	203-291-4	15-40
Copper foil	7440-50-8	231-159-6	10-30
Aluminum foil	7429-90-5	231-072-3	10-30
Graphite	7782-42-5	231-955-3	7-25
Ethylene Carbonate	96-49-1	202-510-0	0-15
Propylene Carbonate	108-32-7	203-572-1	0-15
Lithium Hexafluorophosphate(1-)	21324-40-3	235-362-0	0-15
1,3-propanesultone	1120-71-4	214-317-9	0-1
Separator		/	0-5

4 First Aid Measures

First Aid Measures

Under normal conditions of use, the battery is hermetically sealed.		
	The ingredients in the battery can cause severe allergies and chemical burns. Open the	
Eye Contact	upper and lower eyelids immediately and rinse the eyes with water for more than 15	
	minutes until no chemical remains. Then seek medical attention immediately.	
	The ingredients in the battery may cause skin irritation or chemical burns. Remove	
Skin Contact	contaminated clothing and wash skin with soap and water. Seek medical attention if	
	chemical burns or irritation persists.	
	Ingesting the battery is harmful. The composition of the battery can cause severe	
Ŧ	chemical burns in the mouth, esophagus, and gastrointestinal tract. Do not induce	
Ingestion	vomiting or food or drink if you ingest the battery or disassemble the battery. Seek	
	medical attention immediately.	

Dongguan Poweramp Technology Limited

广东省东莞市松山湖园区兴惠路1号

No.1 Xinghui Road, Songshan Lake Park, Dongguan City, Guangdong Province

Issue: 2021-A Doc No.: 2021-A-063 Issue Date: 9/16/2021

	Ingredients in the battery may cause respiratory allergies, and inhalation of vapor may
Inhalation cause upper respiratory tract and lung allergies. Breathe fresh air and seek me	
	attention immediately.

5 Fire Fighting Measures

Extinguishing media

Suitable fire extinguishing medium	Water or water mist, sand, fire blanket, dry powder or carbon dioxide fire extinguisher
Inappropriate extinguishing medium	None

Special hazards arising from this substance or mixture

In transportation and test engineering, risk factors such as electric box drop, extrusion, puncture, metal short circuit, liquid immersion may occur, and electric shock and fire risk may occur;

If in a confined space, there may be a risk of gas explosion.

Liquids leaking from accidents, including improper handling of fire water, pose a risk of environmental pollution.

Material prepare & training

	water at prepare & training		
Mat	Material prepare		
1	Water mist fire extinguisher: use 1 9-liter water mist fire extinguisher or 2 6-liter water mist fire extinguishers per 500KWH, which can extinguish ABCE fire (solid, non-flammable liquid, gas, electrical fire under 36KV). Or carry electric or manual sprayers as water mist extinguishers. Suspension type water - based fire extinguisher can be hung above the two cargoes.		
2	Waterproof supplies: raincoat, rain boots, rubber gloves; Plastic wrap. Rags.		
3	PPE: mask, high temperature gloves, safety glasses, half mask.		
4	Smoke exhaust tools: every 20 meters 1 wall smoke exhaust fan, or mobile smoke exhaust fan. The vehicle has ventilation holes.		
5	Explosion-proof tools: keep open, such as open environment, vehicles/equipment not airtight. The test must be closed equipment, such as high temperature furnace, high and low temperature impact test instrument. Copper foil with a diameter of 200mm and a thickness of 8 microns shall be placed on the equipment as pressure relief film. Room wall every 20 meters to have a fan, fan displacement at least 5,000 cubic meters per hour.		
6	Neutralizing materials: prepare 10 kg of lime powder every 500KWH to neutralize the outflow electrolyte. The electrolyte will form HF at 8% of the weight when encountering water. Neutralize with alkaline materials.		
7	Voltage measurement: multimeter. Physically seal the current protection to avoid explosion of instrument by mistake.		

Dongguan Poweramp Technology Limited

广东省东莞市松山湖园区兴惠路1号

No.1 Xinghui Road, Songshan Lake Park, Dongguan City, Guangdong Province

Issue: 2021-A Doc No.: 2021-A-063 Issue Date:9/16/2021

Training skills		
1	Turn on or move fan to exhaust smoke	
2	Put out the fire with water mist extinguisher after wearing waterproof appliance. Measure the voltage with multimeter after the battery is dried. After the test voltage is normal, wrap the insulation with plastic wrap, and then transport it.	
3	The leaked electrolyte is neutralized with lime or NaOH powder at a ratio of 8% by weight	
4	Use multimeter to test voltage, pay special attention not to use the wrong gear (to physically close the current block), to prevent instrument explosion	

Fire extinguishing precautions and protective measures

•	
1	Alarm immediately when battery smoke or combustion is detected
2	Wear protective equipment, including respirators and masks. If water is used, PPE should include raincoats, rain boots, insulated gloves, etc.
2	Cut off the power supply
3	Using solid fire extinguishers, it is recommended to use fire extinguishers in the following order: water or mist, sand, fire blanket, dry powder, carbon dioxide fire extinguishers;
4	Exhaust smoke through fans or air circulation.
5	Drying, neutralizing. Dry by fan, if water is used, neutralize with calcium hydroxide.

Figure 1 water based fire extinguisher (Could be used for 36KV electrical fire)

Figure 2 waters prayers to fire extinguisher
(Wear PPE to avoid electrical shock)

6 Accidental Release Measures

On-site: Place the material a suitable container and alert the local police.

In water: When the battery pack is in water, there is a risk of slight electric shock; when electrolyzing water, hydrogen will be generated. Ventilation must be maintained to prevent hydrogen accumulation

Dongguan Poweramp Technology Limited

广东省东莞市松山湖园区兴惠路1号

No.1 Xinghui Road, Songshan Lake Park, Dongguan City, Guangdong Province

Issue: 2021-A Doc No.: 2021-A-063 Issue Date:9/16/2021

and explosion in closed space. If possible, remove the batteries or modules from the water and alert the local police.

7 Handling & Storage

One of the most important risks in the transportation of batteries and battery power equipment is the short circuit of batteries caused by contact between the two poles of batteries with other batteries, metal objects or other conductors. Therefore, packaged batteries and battery cells must be separated in an appropriate way to prevent short circuit and electrode damage. In addition, batteries and battery cells must be packaged in strong external packaging or installed in equipment.

Handling

1	Do not make excessive physical impact or vibration on batteries.		
2	Short circuit should be avoided, although a few seconds of short circuit will not have a serious impact on the battery. A long short circuit can cause the battery to lose energy quickly and generate enough heat to burn the shell.		
3	The sources of short circuit include the random placement of batteries in bulk containers or various metal objects used in battery assembly on equipment. In order to minimize the risk of short circuit of batteries, the protection measures of batteries should be provided when the batteries are transported and stored.		
4	Batteries cannot be disassembled or deformed.		
5	Do not expose the battery to water when it breaks. Operators need insulation protection when handling battery packs that exceed 50V.		
I	Storage		
1	When lithium-ion batteries are stored for a long time, their charging capacity should be between 25% and 75%.		
2	Store in a cool, dry and well ventilated area.		
3	Excessive temperature can lead to a series of battery problems, such as leakage or rust.		
4	Do not put batteries in open fire.		

8 Exposure Control/Personal Protection

Important note: The lithium battery is normally sealed and the powder has no fluidity and will not pose a danger to the contact person. It is strictly forbidden for non-professionals to dismantle batteries or cores without permission.

Dongguan Poweramp Technology Limited

广东省东莞市松山湖园区兴惠路 1 号

No.1 Xinghui Road, Songshan Lake Park, Dongguan City, Guangdong Province

Issue: 2021-A Doc No.: 2021-A-063 Issue Date:9/16/2021

| Engineering Control

Keep away from heat sources and fires and store in dry and cool areas.

9 Physical/Chemical Properties

| Physical/Chemical Properties

Physical state	Solid
Color	Not Applicable
Odor	No Odor
Flash point	Not Applicable
Solubility in ethanol soluble	Not Applicable
Boiling Point	Not Applicable
Solubility in water:	Not Applicable
Vapor pressure	Not Applicable
Explosion limit	Not Applicable
Auto flammability	Not Applicable
Melting Point	Not Applicable
Freezing Point	Not Applicable

10 Stability & Reactivity

| Stability & Reactivity

Stability	Good stability at standard temperature.		
Reactivity	Reactivity None		
	Do not touch water or acidic substances.		
Notice	Products after decomposition: If the aluminum foil packaging of the battery is damaged,		
Notice	then do not contact strong oxidants, acidic substances and high temperature environment,		
	and the electrolyte may volatilize to form hydrogen fluoride.		

11 Toxicological information

No toxic substances will be produced during routine operation and use.

12 Ecological information

Dongguan Poweramp Technology Limited

广东省东莞市松山湖园区兴惠路 1 号

No.1 Xinghui Road, Songshan Lake Park, Dongguan City, Guangdong Province

Issue: 2021-A Doc No.: 2021-A-063 Issue Date: 9/16/2021

If batteries are to be scrapped, they should be selected and disposed of by professional companies.

13 Disposal considerations

Batteries cannot be discarded directly into sewers or directly discharged into the environment. They should be recycled and treated in accordance with local laws and regulations.

14 Transport Information

| Air transportation

The lithium battery should accord with the International Air Transport Association (IATA DGR 62nd Edition) requirements for transportation. The battery or cell should be packed and signed as following table. (If the cell's power less than 20Wh or battery's power less than 100Wh and the package according with PI-965 SectionII, it is not classified as dangerous cargo)

UN NO.	Proper	Power	Package requirements	Label which need to paste
	Shipping			
	Name			
		Cells>20Wh	PI965 Section IA	Class9 lithium battery hazard
		Batteries>100Wh	Limit per package:	label

Notes

1	Cells and/or batteries at a SOC of greater than 30% of their rated capacity may only be shipped with the approval of the State of Origin and the State of the Operator under the written conditions established by those authorities.			
2	Packages prepared according to SectionII of PI965 must be offered to the operator separately from other cargo and must not be loaded into a unit load device before being offered to the operator.			
3	The lithium core and battery goods required by the packaging specification PI965 and PI968 II shall not be packed in the same outer package as other dangerous goods.			
4	Ban lithium ion battery (UN 3480, PI965 Section IA or IB) and lithium batteries (3090, UN PI968 Section IA or IB) with category 1 explosive material (except ammunition) 1.4, 2.1 flammable gas, flammable liquid, 4.1 3 flammable solid, 5.1 class antioxidant and other dangerous goods packaging in the same package.			
5	Ensure that the equipment cannot be moved in the outer packing; If there are more than one piece of equipment in the package, it must be packed tightly together to prevent damage caused by contact with other equipment in the package.			
6	Do not damage or mishandle this package. If package is damaged, batteries must be quarantined, inspected, and repacked.			
7	Cells and batteries identified by the manufacturer as being defective for safety reasons, or that have been damaged, that have the potential of producing a dangerous evolution of heat, fire or short circuit are forbidden for transport.

Ocean shipping

- Transportation refers to the IMDG CODE 39-18 Edition, which are managed according to UN NO 3480/3481 and packaged in the second category. Firm installation, isolation from each other, short circuit prevention, packages with more than 24 lithium cells or 12 lithium batteries: special procedures to be followed when damaged must be marked; special procedures document to be followed when damaged is available on board.
- The clause 188 of IMDG CODE 39-18 Edition required:
- (1) The watt-hour rating of lithium ion cell is less than 20 Wh and the watt-hour rating of lithiumion battery is less than 100 Wh is not classified as dangerous cargo, but each package shall be marked with below lithium battery mark.
- (2) Must be packed in inner packagings that completely enclose the cell and battery(not applicable when contained in equipment), inner packagings shall be packed in strong outer packagings that in accordance with < Model Regulation>4.1.1.1, 4.1.1.2, 4.1.1.5.
- (3) Must be protected so as to prevent short circuits, including preventing short circuits caused by contact with conductive materials in the same container.
- The clause 230 of IMDG CODE 39-18 Edition required:
- (1) The model of each lithium ion cell and battery should meets all testing requirements under Part III, subsection 38.3 of <UN Manual of Tests and Criteria>.
- (2) Shall be equipped with safe exhaust equipment, prevent violent rupture under normal transportation conditions.
- (3) Shall be equipped with effective devices to prevent external short circuit. For more information, Call: +86-769-88989338.

15 Regulatory Information

Regulatory Information	See ACGIH exposure limits information as noted in Section3
US	This SDS meets/exceeds OSHA requirements.

Dongguan Poweramp Technology Limited

广东省东莞市松山湖园区兴惠路1号

No.1 Xinghui Road, Songshan Lake Park, Dongguan City, Guangdong Province

Issue: 2021-A Doc No.: 2021-A-063 Issue Date: 9/16/2021

International	This SDS conforms to European Union (UN), the International Standards Organization (ISO) and the International Labor Organization (ILO) and as documental in ANSI (American National Standards Institute) Standard Z400.1-2010.
Air transportation	According to Civil aviation industry standard MH/T1020-2018 Lithium Battery Air Transport Standard and IATA DGR and ICAO. The international transport and commodity inspection is used this standard at the moment (IMDG CODE),
Ocean shipping	According to International Maritime Dangerous Goods Code to transport and According to the requirements of UN NO 3480/3481 to management the goods.
Land transportation	According to List of Dangerous Goods (GB12268).
Avoid electrical shock	According to Standard for Electrical Safety in the Workplace, NFPA-70E.

16 Other Information

| Charging and labeling

	The battery can be recharged repeatedly. Please use the original battery charger. Do
	not use modified or damaged battery chargers. When the charge exceeds the
Charging	prescribed charging time, the charge can be stopped to prevent the battery from
	overcharging. Charging temperature should be between 0 and 45 (32° F and 113° F).
	There is normal heating phenomenon in the process of battery charging.
	When the voltage exceeds the specified value, it is limited by the internal protection
Charging Voltages	circuit of the battery. If the protective circuit is damaged, please stop using it. Please
and Currents	charge and discharge under specified voltage and current. If the battery voltage drops
	below the specified minimum voltage, please stop using it.
	Chargers provided by the equipment manufacturer shall be used and used in
Warning	accordance with the operating guidelines. It is forbidden to open the battery, close to
Warning	the source of fire, and short circuit, which may cause fire, explosion, leakage and
	personal injury.
Diamagal	Disposal shall be carried out in accordance with the relevant regulations of the United
Disposal	Nations, the state and the local authorities.
